

Mundus Group Inc. an Advanced Technology Company Announces Subsidiary, Goki Manufacturing, to Expand Its Storm Products Racing Equipment Line of Custom High Performance Motocross and All Terrain Vehicle Accessories

LOS ANGELES, March 8, 2011 (GLOBE NEWSWIRE) -- Mundus Group, Inc. (Pink Sheets:MNDP - News) subsidiary, Goki Manufacturing's Storm Products, continues its niche custom parts legacy with easy to install high performance parts available for many major motorcycle brands and All Terrain Vehicles driven by an improvement in the performance over the stock factory installed parts.

"For 40 years, **Goki Manufacturing** and its **Storm Products** brand have become well known in the Off Road Bike and All Terrain Vehicle world for their superior engineered parts and durability under the worse conditions imaginable.

Storm Products provides custom engineered replacement parts for Honda, Kawasaki, Yamaha and Suzuki that are the professional's choice among top motocross, off road racing and ATV high performance equipment.

Whether it is just easier to grab or the parts provide a noticeable improvement, it is because they have been re-engineered in fundamental ways that change the geometry of your bike to improve cornering without affecting your suspension.

"This is why Storm Products was born... to constantly improve upon the factory original manufactured parts for those who are looking for something unique and tricked out, or a novel innovation that improves performance on the track and in the mud wherever you want to come out on top. Storm is here to push the limits of engineering technology," explained Larry Kirsch, Goki Group Founder/CEO.
